Introduction to Programming and Object-Oriented Design Using Java

Jaime NiÃ±o, Frederick A. Hosch

Introduction to Programming and Object-Oriented Design Using Java Jaime NiÃ±o, Frederick A. Hosch

- * Objects First Approach. Students learn to design with objects from the start. In more traditional approaches, students first learn "programming basics in the context of procedural programming in the small." Since this frame of reference is essentially useless when attacking large-scale problems, students must later "re-learn how to approach problems. Instructors can present material from a point of view that will "make sense" throughout the curriculum. Presentation and justification of programming principles and good techniques is easier.
- * Emphasis on the distinction between class specification and implementation. Students learn to develop coherent class specifications early on, and to build components that conform to carefully defined, consistent specifications. The result is more maintainable, error-free code.
- * Early emphasis on testing and test-driven implementation. Students develop a habit of testing as part of the implementation process. Testing is essential to ensure quality programs.
- * Current presentation of object-oriented design and Java. Students benefit from seeing general approaches to commonly occurring design patterns in a specific, well-defined context. This will also make it easier for students to "get the point" when such topics are introduced in upper-level design and software engineering courses. Other features include an emphasis on event-driven interfaces, rather than traditional procedural I/O; informal use of standard UML notation
- * Optional interactive exercises are designed for use with the open-source DrJava integrated development environment (IDE) - a popular tool for compiling and testing programs

From reader reviews:

Shirley Glover:

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite e-book and reading a guide. Beside you can solve your problem; you can add your knowledge by the book entitled Introduction to Programming and Object-Oriented Design Using Java. Try to stumble through book Introduction to Programming and Object-Oriented Design Using Java as your buddy. It means that it can to be your friend when you feel alone and beside those of course make you smarter than previously. Yeah, it is very fortunate for yourself. The book makes you considerably more confidence because you can know anything by the book. So, we need to make new experience and knowledge with this book.

Connie Simpson:

Reading a e-book can be one of a lot of action that everyone in the world adores. Do you like reading book consequently. There are a lot of reasons why people enjoyed. First reading a book will give you a lot of new information. When you read a book you will get new information mainly because book is one of numerous ways to share the information or even their idea. Second, reading through a book will make anyone more imaginative. When you studying a book especially fictional works book the author will bring that you imagine the story how the personas do it anything. Third, you could share your knowledge to other people. When you read this Introduction to Programming and Object-Oriented Design Using Java, you are able to tell your family, friends and soon about yours reserve. Your knowledge can inspire average, make them reading a reserve.

Jeffery Fulmer:

The e-book with title Introduction to Programming and Object-Oriented Design Using Java contains a lot of information that you can learn it. You can get a lot of gain after read this book. This book exist new knowledge the information that exist in this publication represented the condition of the world right now. That is important to you to understand how the improvement of the world. That book will bring you in new era of the global growth. You can read the e-book with your smart phone, so you can read the idea anywhere you want.

Aaron Thomsen:

What is your hobby? Have you heard this question when you got learners? We believe that that issue was given by teacher with their students. Many kinds of hobby, Every person has different hobby. So you know that little person such as reading or as examining become their hobby. You need to know that reading is very important as well as book as to be the matter. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You get good news or update with regards to something by book. Different categories of books that can you decide to try be your object. One of them is this Introduction to

Programming and Object-Oriented Design Using Java.
