William Field Reed

The Descendants of Thomas Durfee, Vol. 2: Of Portsmouth, R. I (Classic Reprint) William Field Reed
Excerpt from The Descendants of Thomas Durfee, Vol. 2: Of Portsmouth, R. I

The First Volume of this work covers the first six generations of the descendants of Thomas Durfee, of Portsmouth, R. I. (born 1643 in England) and this, the Second Volume, is a continuation of the record, bringing forward from the First Volume each person, surnamed Durfee, therein mentioned (in the sixth generation that married), continuing the account to date; the children in last records being in the tenth generation.

These two volumes cover all data of the descendants of Thomas Durfee that can be verified by township records of New England and the Bible records of families in various parts of the United States of America.

The descendants (if any) of Richard, son of Richard (the 2d son of Thomas Durfee) have no record that has been found, which identifies them as such; however it is presumed that one Capt. Richard Durfee, who lived at New London, Conn., about 1730 to 174 - , was probably that person.

There were a large number of Durfeys born in Connecticut, descendants of Joseph and Ann (Buck) Durfey, which tradition claims to be descendants of Thomas Durfee. A record of a large number of these people has been collected by the compiler of this work, also other Durfee families living in Vermont and Rhode Island that are unable to give record of their ancestor, but as it does not appear, from any record of emigrants that came to the United Colonies of America prior to the Revolution, that any Durfees, Durfeys, or Durpheys came, it is probable that all who trace their lineage to a Durfee living in New England before that period were descendants of Thomas Durfee; that by reason of neglect of filing records of families or parts of families in the customary way of their time, a loss of identification has resulted.

About the Publisher

Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at
