A Future with Natural Wood: Traditional & Scientific Facts About Trees Dr Erwin Thoma

Bestselling Austrian author Dr. Erwin Thoma reveals a wealth of knowledge regarding trees, forests and wood. Through the illness of their sons, his family discovered that some modern building materials can cause serious health problems. On their quest to establish a healthy home environment, Erwin tried out his grandfather's traditional methods. He replaced all plywood and chipboard in their home with natural timber and the boys regained their health. In this, his first book translated into English, you will find interesting and amusing stories that reveal Erwin's wealth of knowledge regarding trees, forests and wood. Perhaps, for some readers, this book will contain more information than they imagined possible for such subjects. For others, this will be a welcome introduction to wood-related subjects and an inspiration for a future using natural wood. Written in a colloquial style, it offers an insight into his humble genius.
