Metaheuristics for Scheduling in Distributed Computing Environments (Studies in Computational Intelligence)

Metaheuristics for Scheduling in Distributed Computing Environments (Studies in Computational Intelligence)

Grid computing has emerged as one of the most promising computing paradigms of the new millennium! Achieving high performance Grid computing requires techniques to efficiently and adaptively allocate jobs and applications to available resources in a large scale, highly heterogenous and dynamic environment.

This volume presents meta-heuristics approaches for Grid scheduling problems. Due to the complex nature of the problem, meta-heuristics are primary techniques for the design and implementation of efficient Grid schedulers. The volume brings new ideas, analysis, implementations and evaluation of meta-heuristic techniques for Grid scheduling, which make this volume novel in several aspects. The 14 chapters of this volume have identified several important formulations of the problem, which we believe will serve as a reference for the researchers in the Grid computing community.

Important features include the detailed overview of the various novel metaheuristic scheduling approaches, excellent coverage of timely, advanced scheduling topics, state-of-the-art theoretical research and application developments and chapters authored by pioneers in the field. Academics, scientists as well as engineers engaged in research, development and scheduling will find the comprehensive coverage of this book invaluable.

From reader reviews:

Patricia Koop:

Reading a guide tends to be new life style in this particular era globalization. With looking at you can get a lot of information that could give you benefit in your life. Using book everyone in this world can share their idea. Textbooks can also inspire a lot of people. A lot of author can inspire their reader with their story or perhaps their experience. Not only the storyline that share in the guides. But also they write about the information about something that you need illustration. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors on this planet always try to improve their expertise in writing, they also doing some research before they write to the book. One of them is this Metaheuristics for Scheduling in Distributed Computing Environments (Studies in Computational Intelligence).

Jeremy Bedford:

A lot of people always spent all their free time to vacation or maybe go to the outside with them friends and family or their friend. Do you realize? Many a lot of people spent that they free time just watching TV, or maybe playing video games all day long. If you would like try to find a new activity that is look different you can read a new book. It is really fun for yourself. If you enjoy the book which you read you can spent the whole day to reading a e-book. The book Metaheuristics for Scheduling in Distributed Computing Environments (Studies in Computational Intelligence) it is very good to read. There are a lot of individuals who recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to create this book you can buy often the e-book. You can m0ore simply to read this book from the smart phone. The price is not to fund but this book features high quality.

Teresa Dawkins:

Many people spending their time by playing outside with friends, fun activity together with family or just watching TV the entire day. You can have new activity to pay your whole day by reading a book. Ugh, think reading a book can really hard because you have to take the book everywhere? It fine you can have the e-book, getting everywhere you want in your Smart phone. Like Metaheuristics for Scheduling in Distributed Computing Environments (Studies in Computational Intelligence) which is having the e-book version. So , why not try out this book? Let's observe.

Carl Fox:

In this era which is the greater individual or who has ability in doing something more are more important than other. Do you want to become one among it? It is just simple method to have that. What you need to do is just spending your time little but quite enough to experience a look at some books. One of several books in the top collection in your reading list will be Metaheuristics for Scheduling in Distributed Computing Environments (Studies in Computational Intelligence). This book that is qualified as The Hungry Hills can

get you closer in getting precious person. By looking upward and review this guide you can get many advantages.
