Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies (Wetlands: Ecology, Conservation and Management)

Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies (Wetlands: Ecology, Conservation and Management)

Despite our growing awareness of the vital role they play in the global environment, wetlands remain among the most endangered ecosystems on Earth and are still being destroyed and degraded at an alarming rate. This much-needed publication, which includes contributions from leading researchers and practitioners, presents a holistic perspective on the restoration of wetland ecosystems such as shallow lakes, streams, floodplains and bogs. Through the use of carefully chosen case studies, the authors examine European wetland restoration projects from Scandinavia to Bulgaria and from Ireland to Belarus, focusing on the lessons they can teach to a new generation of conservationists. As well as reviewing the sum of current knowledge on the subject, the text is a store of practical know-how, covering a wide range of conservation approaches and techniques. It analyzes the major problems in the field and identifies key principles for achieving sustainability in wetland restoration. The topics covered include:

- the role of wetlands in landscape functioning
- human interference with natural processes such as water and matter cycles and energy dissipation
- the impact of land use on global problems such as climate change, floods and droughts
- the role played by diversity in wetland functioning

The work shows that without sustainable land use over the totality of their catchment areas, and without cohesive inter-agency cooperation, individual restoration projects will have a short life span. The balance between scientific background and practical restoration makes this book a valuable resource for scientists as well as wetland managers, decision makers and land use planners, as well as students of ecology, nature conservation and environmental protection.

From reader reviews:

Sammy McManus:

The particular book Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies (Wetlands: Ecology, Conservation and Management) has a lot of information on it. So when you read this book you can get a lot of profit. The book was published by the very famous author. This articles author makes some research before write this book. This book very easy to read you may get the point easily after perusing this book.

Gerri Townsend:

Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies (Wetlands: Ecology, Conservation and Management) can be one of your nice books that are good idea. We all recommend that straight away because this guide has good vocabulary that can increase your knowledge in words, easy to understand, bit entertaining but delivering the information. The article writer giving his/her effort to get every word into joy arrangement in writing Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies (Wetlands: Ecology, Conservation and Management) although doesn't forget the main point, giving the reader the hottest along with based confirm resource information that maybe you can be among it. This great information may drawn you into completely new stage of crucial considering.

Cary Freeman:

Beside this Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies (Wetlands: Ecology, Conservation and Management) in your phone, it may give you a way to get closer to the new knowledge or facts. The information and the knowledge you will got here is fresh in the oven so don't be worry if you feel like an aged people live in narrow commune. It is good thing to have Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies (Wetlands: Ecology, Conservation and Management) because this book offers to you readable information. Do you oftentimes have book but you don't get what it's about. Oh come on, that won't happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, similar to treasuring beautiful island. Use you still want to miss the item? Find this book in addition to read it from now!

Laree Drummond:

Book is one of source of knowledge. We can add our expertise from it. Not only for students but additionally native or citizen have to have book to know the update information of year to year. As we know those guides have many advantages. Beside many of us add our knowledge, may also bring us to around the world. With the book Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies (Wetlands: Ecology, Conservation and Management) we can take more advantage. Don't you to be creative people? To get creative person must love to read a book. Just simply choose the best book that suitable with

your aim. Don't end up being doubt to change your life at this book Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies (Wetlands: Ecology, Conservation and Management). You can more pleasing than now.
