The body's hormonal organs are closely tied together through various axes. Though lesser known than the HPA (hypothalamic-pituitary-adrenal) axis, the ovarian-adrenal-thyroid (OAT) hormonal axis is extremely important. When the OAT axis is disrupted, there is an imbalance of hormones that leads to symptoms of estrogen dominance, low energy, and hypothyroidism. Each component of the OAT axis affects the others. Imbalance of one will worsen the other and vice versa. Dr. Lam explains the clinical significance of Ovarian-Adrenal-Thyroid Axis Imbalance in this publication.
