## Drought: Research and Science-Policy Interfacing

Droughts occur in arid and semi-arid areas of the world, but also in humid areas, and can develop over short periods (flash drought) or longer periods (seasons/decades). Even though progress has been made, it remains difficult to adequately characterize, monitor, forecast and manage droughts, due to their multi-faceted nature.

Usually, drought does not directly cause fatalities, but a wide range of socio-economic and environmental effects may occur, and, depending on the region, water-and food-related diseases and casualties can be triggered. Europe has regularly been hit hard by drought (e.g. recently Russia), and large portions of USA, Mexico, Brazil, China, India, Central Asia, South Africa, the Great Horn of Africa, or Australia, have been affected by drought. So globally, drought affects more regions, and more people, than other natural hazards.

Additionally, climate change projections for many areas indicate that droughts are likely to become more frequent and more severe due to the increased variability of precipitation and temperature, tied in some cases to decreased average precipitation and increased average temperature. Hence, there is an urgent need to improve drought preparedness through measures that reduce vulnerability to drought and the risks they pose, in particular considering the uncertain future.

Drought. Research and Science Policy Interfacing includes contributions to the International Conference on DROUGHT: Research and Science-Policy Interfacing (Valencia, Spain, 10-13 March 2015), the final event of the EU FP7 research project DROUGHT-R&SPI (Fostering European Drought Research and Science-Policy Interfacing). The book aims to foster development of drought policies and plans to reduce risk and vulnerability, and to enhance preparedness and resilience.

The book addresses the following topics : (1) past, present and future of droughts (natural hazards, identification and characterization, impacts); (2) indicators, monitoring and forecasting (including early warning systems), risk and vulnerability assessment and reduction at different scales, and (3) preparedness and mitigation options (risk and vulnerability perception, water management and governance under drought conditions, design and implementation of drought policies and plans from the local to the regional, national and international levels, research Interfaces with drought policies).

Drought. Research and Science Policy Interfacing will be of interest to researchers and professionals in those fields related to drought, such as climatology, meteorology, hydrology, agronomy, ecology, water economy, and water management, as well as to policy makers involved in drought preparedness and mitigation strategies at local, regional, national and international levels.

### **From reader reviews:**

#### **Jill Spann:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important work, like looking for your favorite reserve and reading a reserve. Beside you can solve your short lived problem; you can add your knowledge by the e-book entitled Drought: Research and Science-Policy Interfacing. Try to make the book Drought: Research and Science-Policy Interfacing as your friend. It means that it can to be your friend when you truly feel alone and beside those of course make you smarter than in the past. Yeah, it is very fortunated for yourself. The book makes you a lot more confidence because you can know every little thing by the book. So , let's make new experience and also knowledge with this book.

#### **Jeremy Jones:**

As people who live in the modest era should be up-date about what going on or information even knowledge to make all of them keep up with the era that is always change and advance. Some of you maybe will certainly update themselves by reading through books. It is a good choice in your case but the problems coming to a person is you don't know what type you should start with. This Drought: Research and Science-Policy Interfacing is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and want in this era.

#### **Gina Reiter:**

Playing with family in a park, coming to see the coastal world or hanging out with good friends is thing that usually you might have done when you have spare time, and then why you don't try thing that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Drought: Research and Science-Policy Interfacing, you could enjoy both. It is very good combination right, you still need to miss it? What kind of hang-out type is it? Oh occur its mind hangout folks. What? Still don't buy it, oh come on its referred to as reading friends.

#### **Cinthia Jacobsen:**

What is your hobby? Have you heard which question when you got pupils? We believe that that concern was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. Therefore you know that little person similar to reading or as reading through become their hobby. You have to know that reading is very important and book as to be the issue. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You discover good news or update in relation to something by book. A substantial number of sorts of books that can you choose to use be your object. One of them is niagra Drought: Research and Science-Policy Interfacing.
