The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series)

The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series)

Identifying some of the most influential algorithms that are widely used in the data mining community, **The Top Ten Algorithms in Data Mining** provides a description of each algorithm, discusses its impact, and reviews current and future research. Thoroughly evaluated by independent reviewers, each chapter focuses on a particular algorithm and is written by either the original authors of the algorithm or world-class researchers who have extensively studied the respective algorithm.

The book concentrates on the following important algorithms: C4.5, k -Means, SVM, Apriori, EM, PageRank, AdaBoost, k NN, Naive Bayes, and CART. Examples illustrate how each algorithm works and highlight its overall performance in a real-world application. The text covers key topics—including classification, clustering, statistical learning, association analysis, and link mining—in data mining research and development as well as in data mining, machine learning, and artificial intelligence courses.

By naming the leading algorithms in this field, this book encourages the use of data mining techniques in a broader realm of real-world applications. It should inspire more data mining researchers to further explore the impact and novel research issues of these algorithms.

From reader reviews:

Vicki Shah:

Book is actually written, printed, or created for everything. You can know everything you want by a e-book. Book has a different type. As you may know that book is important issue to bring us around the world. Adjacent to that you can your reading expertise was fluently. A e-book The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) will make you to end up being smarter. You can feel considerably more confidence if you can know about every little thing. But some of you think which open or reading any book make you bored. It isn't make you fun. Why they might be thought like that? Have you trying to find best book or appropriate book with you?

Percy Cole:

Book is to be different for every single grade. Book for children till adult are different content. As we know that book is very important normally. The book The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) ended up being making you to know about other know-how and of course you can take more information. It is rather advantages for you. The e-book The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) is not only giving you far more new information but also to become your friend when you sense bored. You can spend your own personal spend time to read your reserve. Try to make relationship while using book The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series). You never sense lose out for everything if you read some books.

Eden Cohn:

Many people spending their period by playing outside with friends, fun activity with family or just watching TV all day every day. You can have new activity to invest your whole day by reading a book. Ugh, do you consider reading a book really can hard because you have to use the book everywhere? It okay you can have the e-book, having everywhere you want in your Smart phone. Like The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) which is keeping the e-book version. So , why not try out this book? Let's see.

Lori Gonzales:

This The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) is brand-new way for you who has intense curiosity to look for some information since it relief your hunger associated with. Getting deeper you in it getting knowledge more you know or perhaps you who still having small amount of digest in reading this The Top Ten Algorithms in Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) can be the light food to suit your needs because the information inside this particular book is easy to get simply by anyone. These books produce itself in the form and that is reachable by anyone, sure I mean in the e-book contact form. People

who think that in reserve form make them feel drowsy even dizzy this reserve is the answer. So there is no in reading a reserve especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss the idea! Just read this e-book variety for your better life as well as knowledge.
