## **Computational Intelligence and Its Applications: Evolutionary Computation, Fuzzy Logic, Neural Network and Support Vector Machine Techniques H K Lam**

This book focuses on computational intelligence techniques and their applications -- fast-growing and promising research topics that have drawn a great deal of attention from researchers over the years. It brings together many different aspects of the current research on intelligence technologies such as neural networks, support vector machines, fuzzy logic and evolutionary computation, and covers a wide range of applications from pattern recognition and system modeling, to intelligent control problems and biomedical applications.

Fundamental concepts and essential analysis of various computational techniques are presented to offer a systematic and effective tool for better treatment of different applications, and simulation and experimental results are included to illustrate the design procedure and the effectiveness of the approaches.

Readership: Graduates and researchers in computer science, especially those specialising in artificial intelligence, neural networks, fuzzy logic and pattern recognition.

### **From reader reviews:**

#### **James Collis:**

Book is to be different per grade. Book for children until adult are different content. To be sure that book is very important normally. The book Computational Intelligence and Its Applications: Evolutionary Computation, Fuzzy Logic, Neural Network and Support Vector Machine Techniques was making you to know about other knowledge and of course you can take more information. It is very advantages for you. The book Computational Intelligence and Its Applications: Evolutionary Computation, Fuzzy Logic, Neural Network and Support Vector Machine Techniques is not only giving you a lot more new information but also to get your friend when you experience bored. You can spend your own personal spend time to read your guide. Try to make relationship with all the book Computational Intelligence and Its Applications: Evolutionary Computation, Fuzzy Logic, Neural Network and Support Vector Machine Techniques. You never truly feel lose out for everything in the event you read some books.

#### **Raymond Custer:**

The feeling that you get from Computational Intelligence and Its Applications: Evolutionary Computation, Fuzzy Logic, Neural Network and Support Vector Machine Techniques could be the more deep you rooting the information that hide in the words the more you get interested in reading it. It doesn't mean that this book is hard to be aware of but Computational Intelligence and Its Applications: Evolutionary Computation, Fuzzy Logic, Neural Network and Support Vector Machine Techniques giving you enjoyment feeling of reading. The writer conveys their point in selected way that can be understood by anyone who read it because the author of this publication is well-known enough. This particular book also makes your own personal vocabulary increase well. It is therefore easy to understand then can go to you, both in printed or e-book style are available. We highly recommend you for having this kind of Computational Intelligence and Its Applications: Evolutionary Computation, Fuzzy Logic, Neural Network and Support Vector Machine Techniques instantly.

#### **Levi Ryan:**

People live in this new morning of lifestyle always attempt to and must have the free time or they will get lots of stress from both way of life and work. So , once we ask do people have extra time, we will say absolutely without a doubt. People is human not only a robot. Then we ask again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer may unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative throughout spending your spare time, the book you have read is Computational Intelligence and Its Applications: Evolutionary Computation, Fuzzy Logic, Neural Network and Support Vector Machine Techniques.

#### **Adam Tonn:**

Can you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Try

to pick one book that you never know the inside because don't determine book by its deal with may doesn't work at this point is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside appearance likes. Maybe you answer may be Computational Intelligence and Its Applications: Evolutionary Computation, Fuzzy Logic, Neural Network and Support Vector Machine Techniques why because the fantastic cover that make you consider concerning the content will not disappoint you. The inside or content is definitely fantastic as the outside as well as cover. Your reading sixth sense will directly assist you to pick up this book.
