## **What's Your problem? No, really, what IS your Problem?: The Sherlock Holmes Guide to Problem Identification (The Production Line Book 1) Frank Daley**

The Sherlock Holmes Guide to Problem Identification.

Have you ever tried to solve a problem and you simply “can’t” do it?

Doesn’t it drive you crazy?

You lose sleep, worry, and get frustrated and anxious because the problem really needs to be solved but you simply can’t figure out how to fix it ?

Do you sometimes feel like calling Sherlock Holmes?

What’s Your problem? (No really, what IS your problem?) helps you stop blindly trying to solve a problem when you don’t even know what it is.

Sherlock Homes doesn’t start to solve a case without knowing what the crime is. He identifies the actual crime then proceeds to solve the case (the problem).

You can’t solve a problem until you know what it is.

That sounds obvious but it’s not.

Many people fail to solve problems because they don’t know there is a first step in the process: problem identification.

Lots of times we think or feel we know what a particular problem is but when we try to fix it, it just doesn't work. We think hard but the problem remains. Are we slow or dumb?

NO, it’s because we can’t solve a problem until we name it.

Sherlock finds the real problem by dismissing all the wrong-headed ideas (from himself or others). He knows when his mind or emotions are playing tricks on him. He knows himself.

You will know yourself better too when you read this book!

The writer, Frank Daley, is the founder of Self-Knowledge College, a self-development company that helps people figure out what problems are keeping them from being personally and professionally successful. His book is

**WHO ARE YOU AND WHAT ARE YOU DOING HERE?**

The way to know yourself and get what you want.

You can learn more here: <http://www.selfknowledgecollege.com>

What's Your Problem? does NOT teach problem solving (Sherlock teaches that)—it teaches the thing you

have to know BEFORE you try to solve problems—the thing Sherlock does first: figures out what the real problem is.

What you think, or feel, or guess is the problem is not going to help you.

That's the way we misidentify problems. (Then we wonder why we can't solve them.)

It requires a new look at approaching problems but it won't take long to learn and there are case studies and examples to speed things along.

Stop worrying, reduce frustration and get some sleep when you are trying to solve a personal problem (and often business problems too!). This book gives you a proven approach to, well, “see” and solve your problem!

This step-by-step guide to problem identification teaches:

- How to find emotional blocks that stop you from identifying the real problems
- How to “see” hidden psychological biases that prevent problem identification
- How to correct poor thinking habits that camouflage the real problems

What's Your problem? (No really, what IS your problem?) shows you how to identify real problems, and to “spot” them before you try to fix phantom problems.

These are real-world approaches you can copy for identifying (and then seeing ways to solve) problems with your spouse, boss, friends, co-workers or family. This book will save you time, energy, stress, and maybe even money!

Stop wasting your days trying to solve the wrong problems.

If you could do this yourself, you would have done it by now.

Fortunately, you can solve that problem right now!

Be like Sherlock.

Identify the real problem.

Then, at least, you'll have a shot at solving it!
