An updated guide to the approach, assessment and management of poisoned patients Poisoning is a common emergency department presentation, and is the third major cause of hospital admission in Australia. The new edition of this all-encompassing toxicology reference describes the risk assessment-based approach pioneered by its principal authors. *The Toxicology Handbook* is written for hospital-based doctors at all levels and is divided into six sections, including an approach to the poisoned patient, specific toxins, antidotes, toxinology and antivenom. It also deals with specific toxicology considerations like alcohol abuse, dependence and withdrawal, and poisoning in children and the elderly. Important locally relevant information on bites, stings and envenoming is also included. The concise layout of this didactic medical guide enables readers to quickly locate required information - essential in a poisoning emergency. Established as a primary reference in Australian Poisons Information Centres, the *Toxicology Handbook* is useful for doctors, nurses, ambulance service paramedics and pharmacists alike.

- all chapters and references reviewed and updated
- a major review of snake bite management and snake antivenoms in light of new evidence
- new chapters on mushroom poisoning, plant poisoning, amphetamine abuse and solvent abuse
- new chapters on poisoning with newer anticonvulsant drugs, barbiturates, button batteries, chloral hydrate, local anaesthetic agents, quinine and tramadol
- a new antidote chapter on intravenous lipid emulsion
- book chapters have been reorganised for enhanced clinical usability - for example, consolidation of drugs of abuse
- now available in an enhanced electronic format
