## Isotope labeling in Biomolecular NMR (Advances in Experimental Medicine and Biology)

NMR spectroscopy has undergone a revolution in recent years with the advent of several new methods overcoming the problems of sensitivity and resolution. Recent developments in biotechnology have made it easier and economical to introduce  $^{13}\text{C}$ ,  $^{15}\text{N}$  and  $^2\text{H}$  into proteins and nucleic acids. At the same time, there has been an explosion in the number of NMR experiments that utilize such isotope labeled samples. Thus, a combination of isotopic labeling and multidimensional, multinuclear NMR has opened up new avenues for structural studies of proteins, nucleic acids and their complexes.

This book will focus on recent developments in isotope labeling methods for structural studies of small molecules, peptides, proteins and nucleic acids. The aim of the book is to serve as a compendium of isotope labeling for the biomolecular NMR community providing comprehensive coverage of the existing methods and latest developments along with protocols and practical hints on the various experimental aspects. The book will cover a wide range of topics in isotope labeling under one title including emerging areas of metabolonomics and solid state NMR.

### **From reader reviews:**

#### **Sharon Stennis:**

Inside other case, little persons like to read book Isotope labeling in Biomolecular NMR (Advances in Experimental Medicine and Biology). You can choose the best book if you want reading a book. Given that we know about how is important a new book Isotope labeling in Biomolecular NMR (Advances in Experimental Medicine and Biology). You can add understanding and of course you can around the world by way of a book. Absolutely right, due to the fact from book you can realize everything! From your country right up until foreign or abroad you may be known. About simple factor until wonderful thing you are able to know that. In this era, we could open a book as well as searching by internet system. It is called e-book. You may use it when you feel bored stiff to go to the library. Let's go through.

#### **Walter Crouse:**

As people who live in the modest era should be change about what going on or facts even knowledge to make all of them keep up with the era that is always change and advance. Some of you maybe may update themselves by looking at books. It is a good choice in your case but the problems coming to you is you don't know what type you should start with. This Isotope labeling in Biomolecular NMR (Advances in Experimental Medicine and Biology) is our recommendation to help you keep up with the world. Why, since this book serves what you want and need in this era.

#### **Michael Ramsey:**

Are you kind of hectic person, only have 10 or even 15 minute in your day to upgrading your mind skill or thinking skill even analytical thinking? Then you have problem with the book compared to can satisfy your short time to read it because all this time you only find book that need more time to be study. Isotope labeling in Biomolecular NMR (Advances in Experimental Medicine and Biology) can be your answer given it can be read by a person who have those short spare time problems.

#### **Jack Bell:**

You are able to spend your free time to study this book this guide. This Isotope labeling in Biomolecular NMR (Advances in Experimental Medicine and Biology) is simple to create you can read it in the park, in the beach, train as well as soon. If you did not possess much space to bring typically the printed book, you can buy the actual e-book. It is make you much easier to read it. You can save typically the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.
